

Beach and Bay Status Report

Water quality closures and advisories for
San Diego County Beaches
August 27 2:50 PM

Signs warning of contaminated water are posted at the following locations.

Closures:

These beaches are closed to water contact due to sewage spills that may impact ocean or bay waters.

NONE

Advisories: Water contact should be avoided at the following beaches due to bacterial levels that exceed health standards:

La Jolla

Station: Children's Pool

Status Since: Sept 1997

Reason: On-going contamination by harbor seals

For beaches next to storm drains, rivers, and lagoon outlets:

During dry weather, avoid contact with runoff and recreational waters within at least 75 feet from where runoff enters ocean or bay waters.

Re-Opened.

Mission Bay

Station: 1. Bonita Cove.... 2. Ski Beach. – Vacation Isle.

Status Since Aug 27

Call the DEH Beach & Bay Water Quality hotline at 619-338-2073 for updated information, or log onto the DEH web site at www.sdbeachinfo.com.

To see a map of monitoring stations and locations under warning for water contact, go to http://sdwatersheds.org/wiki/Beach_Monitoring

Shellfish Quarantine.

There is quarantine on mussel consumption due to risk of PSP or domoic acid poisoning for mussels taken from all coastal waters in California. For more information on the shellfish quarantine call 800-553-4133.

Contact your local lifeguard service for hazards associated with large surf and rip currents.
