Infeasibility Exemption

Complete this form if it is infeasible for you to comply with all of the requirements set forth by the County.

"Infeasible" means that there is no recycling, salvage, or construction demolition inert processing (CDI) center or onsite reuse options for all or part of the debris a project will generate within a 50 mile radius of the project area, the location(s) from which the applicant regularly operates it's business, or stores its construction or demolition equipment.

Use the following space to explain why your project should be considered exempt from the County's Debris Management Plan requirements.
